Map 3 - Areas Meeting the 5 Priority Criteria

The Lower Wolf River Bottomlands Natural Resources Area

The Five Priority Criteria

- Protect the Lower Wolf River and its tributaries river shoreline.
- Provide an opportunity for a corridor connection for wildlife habitat and recreational opportunities.
- Protect areas with endangered and threatened resources, and critical habitat.
- Include spawning areas for protection and habitat management.
- Include larger tracts of land that promote ecological and/or recreational opportunities.

The data shown on this map have been derived from various sources, and are of varying accuracy. This map is not intended to be used for any purpose, but is for informational purposes only. It is not an authoritative source of information about legal and ownership of public lands. Users of this map should consult the ownership of land through other means in order to avoid misapprehension. No warranty, expressed or implied, is made regarding accuracy, applicability, or timeliness of the information depicted on this map.

The DNR Managed Lands data is a partial representation of the 1995 "Inventory of the Division of Lands and Townships" (Inventory of Lands and Townships) and may include areas and features not shown on this map. It is not intended as a legal representation of legal ownership boundaries. All requests for information or data should be referred to the DNR, Division of Lands and Townships, 1000 North Lincoln Avenue, Madison, WI 53706.
